DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 5-8 and 10 are rejected under 35 U.S.C. 102(a) as being anticipated by Ishida et al ("Sub-10-nm-Scale Lithography Using *p*-chloromethyl-methoxy-calix[4]arene Resist", Jpn. J. Appl. Phys., Vol.42 (2003), pg.3913-3916).

Ishida teaches a resist material containing present compound of Chemical Formula 1 (see Ishida's compound shown in Fig.1 (a)). The solvents which Ishida uses include PGME, PGMEA, ethyl lactate, ethyl propionate, n-butyl acetate and 2-heptanone (see Table I). Ishida uses such resist material in EB lithography system (see the right hand column on the first page of the reference) The resist pattern of Ishida is further used in plasma etching (see the right hand column on the second page of the reference). Thus, Ishida teaches present inventions of claims 1, 2, 4-8 and 10.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Nagasaki et al ("Novel Conformational Isomerism of Water-Soluble Calix[4]arenes", Tetrahedron, 1992, Vol.48(5), pg.797-804).

Nagasaki teaches present compound of formula (I) on pg.799 (see the second compound on pg.799). Therefore, Nagasaki teaches present invention of claim 1.

Allowable Subject Matter

4. Claims 3, 4, 9 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. None of the cited prior arts teaches or suggest present compounds of claim 3, the presence of additional oligomer or organic polymer compound as claimed in claim 4, nor the present developer of claim 9.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sin J. Lee whose telephone number is 571-272-1333. The examiner can normally be reached on Monday-Friday from 9:00 am EST to 5:30 pm EST.
